CAREER OBJECTIVE

Final-year B.E. Computer Science and Engineering student with knowledge of Python, Java, SQL, Data Analytics, Machine Learning, and software development. Hands-on experience in developing web applications using Angular, Spring Boot, and MySQL. Strong problem-solving and analytical skills with an interest in applying data-driven techniques to solve real-world business problems.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

2023 – 2027

Panimalar Engineering College, Chennai | CGPA: 8.71

HSC

2023

Jaigopal Garodia Vivekananda Vidyalaya School, Chennai

SSLC

2021

Jaigopal Garodia Vivekananda Vidyalaya School, Chennai

TECHNICAL SKILLS

- Programming Languages: Python, Java — with a solid understanding of data structures and object-oriented concepts.
- Web Development: HTML, CSS, JavaScript — building responsive and user-friendly web pages.
- Database Management: SQL — writing queries for data storage, retrieval, and manipulation.
- Tools & Concepts: Git/GitHub, Machine Learning fundamentals, and Data Analysis using Python libraries.

INTERNSHIP EXPERIENCE

Developer Intern — Cognizant

June 2026 – July 2026

- Contributed to the development of a full-stack web application using Angular and Spring Boot, working across frontend components and REST API integration.
- Collaborated with the team on debugging, code reviews, and implementing features as part of an agile development workflow.

AI/ML Data Expert Intern — NDV Techsys Solutions

June 2025 – July 2025

- Gained practical exposure to AI/ML concepts through hands-on implementation.
- Assisted in building and evaluating machine learning models for prediction and classification tasks.

Python with Data Science Intern — NSIC Technical Solutions

December 2024

- Worked with datasets in Python to perform data analysis and generate reports.
- Applied core data science concepts using Python libraries through hands-on exercises.

ACADEMIC PROJECTS

E-Commerce Website (HTML & CSS)

- Designed and developed a static e-commerce website with product pages, navigation, and a user-friendly interface.

AI-Based Soil Health Analyzer with Local Language Feedback

- Built an AI-based system to capture and analyze soil health data using a smartphone.
- Applied data analysis and basic machine learning techniques to assess soil conditions.
- Implemented local-language voice and text feedback to support informed agricultural decisions.

CERTIFICATIONS

- Programming in Java — NPTEL
- Introduction to Machine Learning — NPTEL
- Cloud Infrastructure and Generative AI — Oracle
- UI/UX Designing — Great Learning
- Front End Web Developer — Infosys Springboard
- Introduction to Database Management System — NPTEL

INTERPERSONAL SKILLS

Leadership • Problem Solving & Analytical Thinking • Team Collaboration • Adaptability • Effective Communication • Time Management
